Subject: FW: Building Demolition 905 N. Poplar, Leonard, TX

Good Morning, Mr. Moore,

If no asbestos is present and demolition will take place then the department will need to receive a notification for demolition only.

All notifications including emergency notification can be submitted online at <https://vo.ras.dshs.state.tx.us/datamart/login.do> or by mail. If you prefer to send the notification by mail you can find the notification form in the at the bottom of the page on the following website <http://www.dshs.texas.gov/asbestos/forms.aspx#notification>. If mailing the form in, please mail it to the address provided at the bottom of page 3 on the notification form.

For emergency notification, the notification must be post marked or received online no later than the following working day of the commencement of demolition. If completing the form online answer "yes" for the question "Is this project an emergency". If you are completing the hard copy notification, check the box next to emergency and provide a description of the reason for the emergency. DSHS is no longer giving out reference numbers for emergency notifications, so you do not need to complete the reference numbers, whom you spoke to and date and time fields that are located in that emergency section.

If you have any questions or need further assistance, please contact me by email or by phone at 512-834-6642. Thank you.

Sincerely,

Tenessa Rodriguez, Manager

Subject: Building Demolition

Hello:

The EPA anticipates doing a building demolition at the end of October or beginning of November as part of a Federal Government Lead Superfund Cleanup. We will be doing an asbestos inspection next week to determine if there is any asbestos as part of the building that may need to be removed. We do not anticipate this as the building is a metal building inside and out with no insulation. We will be making a notification but since this is a Superfund Site, We will be requesting an emergency approval as this is a fund lead time critical removal action to address PCB soil contamination on an industrial, city, and residential properties.

The Site Name is : F.J. Doyle Salvage
Location: 905 N. Poplar, Leonard, Fannin County, TX

Please advise of forms that I will need to fill out to document this action.

We are also working with Ms. Emily Hall the Environmental Surveillance and Toxicology Branch of the Texas Department of State Health Services on the impacts of the PCBs to local residents.

Thanks

Gary W. Moore (6SF-ER)
